

Hamilton School

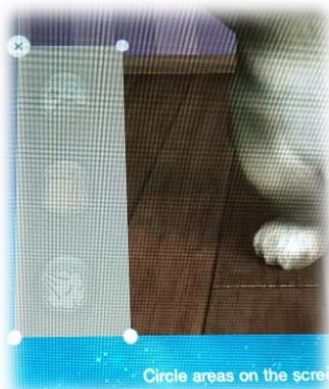

Striving to be a great school where people work together to transform lives

How to lock a student on an app

Open the app you want to lock, triple tap the Home button (The black, round button at the bottom). New options will appear.

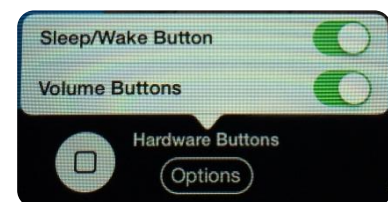

You can restrict the use of the home and volume buttons from the menu that appears by pressing the Options button (1) in the bottom left.

You can restrict areas of the screen by pressing the touch button (2) in the middle and drawing circles on the screen.

When ready, click the word Start/Resume (3) in the top right.

To end the restriction, triple tap the home button again, type in the lock code and press the End button (4) in the top left.

Note: The iPad will remember your settings next time you start restricting the same app.
For a demonstration, see Adam.
